CreativeComputerSciencestudentwith a strongfoundation in software development andcomputationaldesign. Experiencedinintegrating technology, algorithmicproblem-solving, anduser-centered design principles to deliver innovative solutions, UI/UX design and software development fundamentals. Academic projects focused on optimizing performance and improving user interactions.

Technical Skills

· Programming Languages: **C++, Javascript, Python, Swift, HTML, CSS**
· Tools and Frameworks: **Xcode, Core Data, Git, React (basic), MySQL**
· Design Tools: **Adobe Photoshop, Premiere, Lightroom**

Main Projects

Gratitude Journal App (Swift, Core Data) - FeelBetter App

Developed a mobile app featuring a gratitude journal, mood tracker, and guided meditations.

Integrated Core Data for offline data persistence and streamlined the user interface using SwiftUI.

Designed features to promote mental well-being and increase daily engagement.

Trading Website Prototype (HTML, CSS, JavaScript) - TradingBot

Developed a responsive trading platform with real-time data visualization and automated trading strategies.

Enabled clients to execute trades seamlessly using pre-defined conditions.

Optimized performance for a fast and user-friendly experience.
